The prior art of record, specifically Miyamoto, discloses a game system that comprises a common display and multiple portable gaming units that comprise individual displays. The common display, displays a first broad field of view extent and the portable display units display a second narrow field of view extent. Mine teaches a gaming system that allows the user of the game system to control multiple virtual game characters wherein the user can activate control buttons of a hardware controller to switch which virtual game character is under the user's control. Kobayashi teaches the use of a video display that displays a radar map and the main game virtual environment upon the game display.

Regarding claims 1 – 8, the prior art of record alone or in combination fail to teach or suggest a common display device that is viewable by multiple players and at least one personal display that a single player uses. Wherein the personal display unit displays a first game screen output image that comprises a full-extend field of view of the game space containing the first game character and other game characters. The common display device unit displaying a second game screen output image presenting a narrow-extend field of view of the game space that is centered around the second game character and at the same time a narrow-extend field of view centered about each other player controlled game characters. The different extents of field of view being

displayed depending on a predetermined handicap assigned to each player-controlled character.

Regarding claims 9 - 16 and 25, the prior art of record alone or in combination fail to teach or suggest a common display device that is viewable by multiple players and at least one personal display that a single player uses. Wherein the personal display unit displays a first game screen output image that comprises a full-extend field of view of the game space containing the first game character and other game characters. The common display device unit displaying a second game screen output image presenting a narrow-extend field of view of the game space that is centered around the second game character and at the same time a narrow-extend field of view centered about each other player controlled game characters.

Regarding claims 17, 26 - 28, the prior art of record alone or in combination fail to teach of suggest a first game screen output upon a single terminal display that presents a full-extend field of view display of the entire game space showing the first character and at least one or more other game characters, and a second output to a second different terminal display device displaying a narrow-extend field of view that only encompasses a small portion of the playable game space as seen from the second game characters point of view within the game space, wherein each of the different extents of the field of view of the game space depend on a predetermined handicap associated with the particular game character that is being controlled at the terminal device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
